Staff: G-3

Directorate: LDAC

**Mission:** AMC's Logistics Data Analysis Center provides sustainment data, information technology and decision support to improve readiness and enable effective Army Senior Leader decision-making from the Strategic Support Area to the tactical point of need.

## Functions

across all AMC Campaign Plan LOEs

- Provide technical and programmatic oversight of solution design, development, testing, implementation, enhancement and sustainment activities through the use of current innovations to deliver trusted business intelligence and analytics decision support tools in order to optimize Army Strategic Support Area effectiveness
- Conduct research and analytics to solve the most challenging problems and to enable fact-based, resource-informed decisions by Army Senior Leaders from the Joint Strategic Support Area to the tactical point of contact across the spectrum
- Develop and manage functional requirements for the design and sustainment of multi-functional business intelligence and information technology capabilities
- Enable the transition to sustainment across all phases of Product Support development and execution through the standardization of Product Support Analysis and Logistics Product Data; acquisition and logistics software tools; and ensuring adequate logistics product support is available for systems soon to be fielded or transitioned to AMC
- Day-to-day data management allowing the Army to operate automated logistics systems utilizing Army master data and the Enterprise Materiel Master catalog by integrating and improving data quality across the Army enterprise to ensure accurate information is leveraged to accomplish logistics missions
