

How Army Space 2030-2040

UNCLASSIFIED

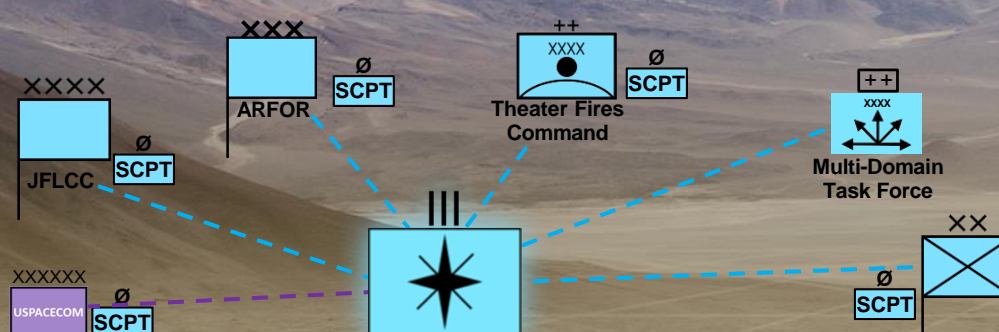

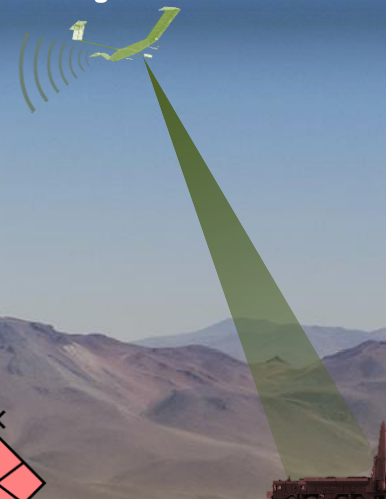

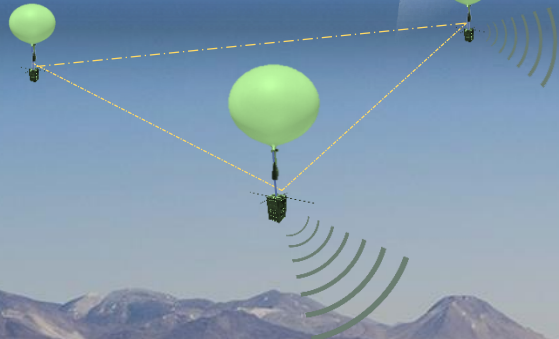

High Altitude Company provides multiple capabilities through payload pairing: C2 resiliency enabled by mesh networks for redundant tactical communications.

NAVWAR effects delivered from high altitude payloads or launched effects

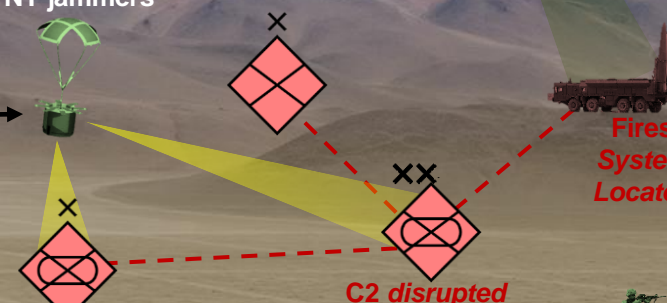

Deep Sensing enabled by high-altitude long endurance UAS

Theater Strike Effects Group synchronizes task-organized ground-based space and high-altitude forces in support of theater operations

Space control company ensures freedom of action in space and when directed, deny adversary freedom of action in space

NAVWAR Company delivers ground launched PNT jammers

Counter surveillance and reconnaissance (CSR) inhibits enemy surveillance of friendly operational and tactical maneuvering forces

Central Idea: Army space forces integrate Army, national, joint, commercial and partner space assets to employ expeditionary, responsive, and mobile theater-focused space and high altitude capabilities, delivering down to the tactical level, space effects to achieve overmatch against our adversaries during multi-domain operations.
